

ALAN OLIVER

FULL STACK DEVELOPER

I'm a junior software developer with experience in all things JavaScript. I have 6 months work experience in an app development role using React.js and Node.js. In my spare time I enjoy speaking Mandarin Chinese, learning about algorithmic trading with Python and working out.

SKILLS

- HTML5, CSS3, Javascript ES6, jQuery
- Node JS, Express
- MongoDB
- APIs, JSON, Scraping
- React.js, Typescript, React Testing Library (TDD)
- Git, Github, Technical Workflow

PROJECTS

CRUMBS CRM APP

- Atlassian marketplace customer relationship management app. I built a customer screen glance setting configuration as well as an advanced filtering search feature for the premium version of the app.

MORE DEAL SOURCING LANDING PAGE

- Node Js Express app with nodemailer for collecting client emails in MongoDB.

JAVASCRIPT SNAKE WITH LEADERBOARD SCORE

- Modular native JavaScript code includes basic API and routing for leader board and posting new scores.

A/B TESTING WECHAT MINI PROGRAM - ASK THE CROWD

- Instagram UI/UX inspired voting app developed using JavaScript managing backend server data in local data and SASS.

WORK EXPERIENCE

New Verve Consulting (Junior Developer) - September 1st 2020-Present. Tasks:

- Developing application code with React.js using the agile methodology.
- Unit testing and typing all new app features with React Testing Library and Typescript.
- Estimating and executing tasks on the Trello board.
- Deploying code using git and reviewing colleagues' pull requests.
